

## Quick Tip: Arbitrary Rotation

The horizontal and vertical perspective is an important part of an image. An inadvertent “tilt” and ruin an otherwise great picture. ROES provides a quick and easy solution to this problem!

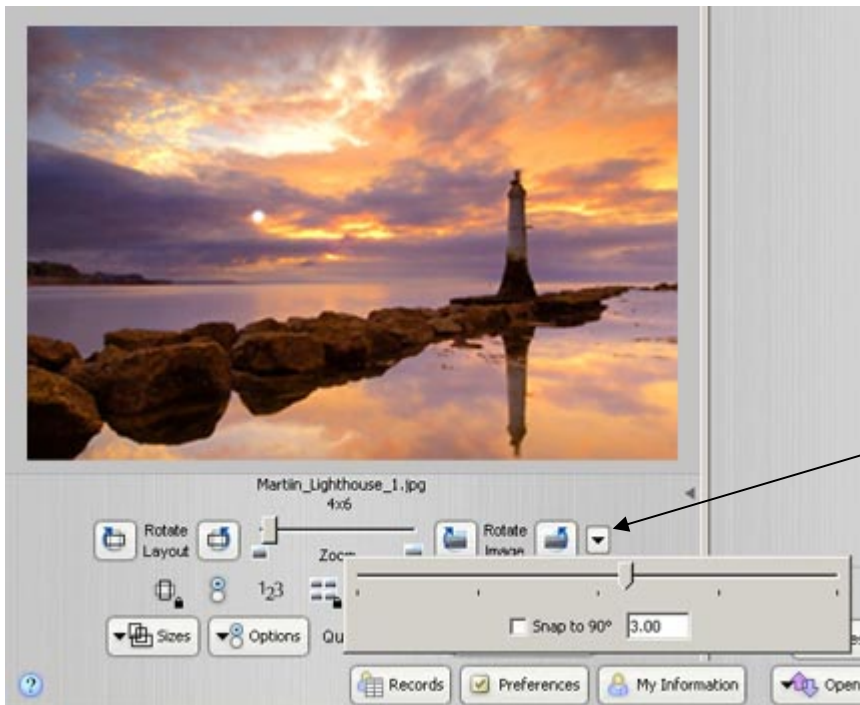

Tilted

Corrected

Simply click on the **Arbitrary Rotation** icon and a pop-up window will appear that allows you to visually adjust the angle of the image. The image will automatically zoom in to ensure a full bleed print. You can deselect the rotation by clicking on the Snap to 90° check box, or entering zero in the dialog box. *Remember to Zoom your image back out if you deselect the rotation.* You can also use the rotation feature to create some pretty cool special effects!
